## PROJECTS

TwittR | (Twitter Clone) | *(React, Redux, Python, Flask, PostgreSQL)*

[live](#) | [github](#)

- Designed UI and UX for a Twitter Clone, as well as the database models and queries that would allow users to interact with others through tweets and comments.
- Implemented an intuitive navigation using React / Redux to provide a user friendly UI.
- Styled the application in a way that would make the user feel calm and relaxed.
- Utilized AWS S3 to facilitate user image uploads.

HeirBnB | (AirBnB Clone) | *(React, Redux, Python, Flask, PostgreSQL)*

[live](#) | [github](#)

- Configured backend routes by joining queries, reducing database queries and providing the user a faster way to navigate through the app.
- Implemented Redux thunks to allow the frontend communicate with the backend when a dispatch was called.
- Added CSS styling to the components to make the page feel easier and pleasing to navigate.

Kuora | (Quora Clone) *(React, Redux, Node JS, Express, PostgreSQL)*

[live](#) | [github](#)

- Developed extensible React components that can be reused and improving the code readability and efficiency.
- Redesigned UI and UX to maximize the use and intuitiveness of the Edit and Delete features.
- Designed a Postgres schema to efficiently store stories and comments.
