(404) 429-4388
osvaldosalomonv@gmail.com

I'm a creative and skilled software developer. My expertise lies in problem-solving, communication, and collaboration, supported by a solid background in front-end and web app development. With experience in industries such as Home & Personal Care and Customer Experience, I have successfully contributed to various projects, including the development of intuitive user interfaces, reusable components, and fixing of critical bugs.

EXPERIENCE

Accenture, Atlanta, GA—Software Developer

AUGUST 2023 - PRESENT

NADA (Not Another Dating App), Atlanta, GA —Software Developer Intern

MARCH 2023 - AUGUST 2023

EDUCATION

App Academy Coding Bootcamp, Remote — *Full Stack Web Development*

FEBRUARY 2022 - AUGUST 2022

Coding boot camp prioritizing the fundamentals of web development. One of the top-ranked software engineering boot camps in the country with a < 3% acceptance rate and over 1000 hours of instruction and pair programming.

PROJECTS

Project MARS— *Software Development*

Developed and integrated reusable components and features that contributed to the overall app. · Collaborated with designers to implement a responsive and intuitive user interface. · Diagnosed and fixed critical bugs related to navigation and state management, resulting in a smoother user experience and fewer crashes. · Worked closely with a team of developers, designers, and product managers, contributing to daily stand-ups and sprint planning sessions.

Project mAIr (GenAI powered 3D humanoid)— *Software Development and Testing*

Evaluated Conversation Flow and Implemented Improvements · Assessed and analyzed the conversation flow within the Digital Human Portal to ensure consistency with the Figma design specifications. · Developed a comprehensive testing tracker to systematically document and address identified issues. · Enhanced AWS Lex by adding new intents to resolve identified bugs and improve overall functionality.

Project EA Hub & Capability Uplift — *Technical Contribution and Support*

Developed and configured connectors for SharePoint and Confluence, facilitating seamless integration with Microsoft Search. · Created detailed PowerPoint presentations on BCM and APO strategies, aiding stakeholder communication and understanding. · Played a crucial role in testing and validating connector functionality and performance to ensure optimal operation. · Produced and updated documentation for the BCM in OrbusInfinity, aligning business capabilities with technological infrastructure.
